

TEKEVER

# AR4

## MISSION: SIMPLIFY

Designed to be simple to operate,  
field tested and battle proven,  
a perfect fit for operational  
requirements.

- ☆ ISTAR Missions
- 🎯 Anti-terrorist Surveillance
- 🔥 Environmental Surveillance
- 🏗️ Infrastructures Monitoring

# AR4

## LIGHT RAY EVOLUTION

The AR4 LIGHT RAY Evolution is the ideal system for highly demanding Intelligence, Surveillance, Target Acquisition and Reconnaissance (ISTAR) missions.

User friendliness, easy transportation and intuitive operation are just some of the features this best-in-class UAS has to offer.

Focus on ease of use, transportability, maintainability and payload flexibility

- Validated and battle proven by multiple security and military forces

Real-time Precision Imagery (High-resolution Image and Video)

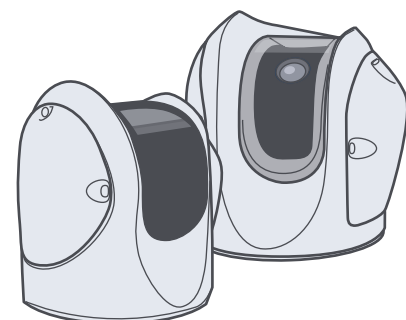

Powerful intelligent detection, identification and tracking capabilities

Entire system (vehicle, onboard and ground systems and comms) developed by TEKEVER, and is ITAR Free

- Fully modular system, supporting immediate parts interchange, even with other product lines

- Focus on system autonomy, flexibility and capability to evolve

- Commercially launched at Farnborough 2012, having been the first UAS to ever to perform regular daily flights during the Airshow

AR4	
Dimensions	2.0 x 1.4 m
Cruise Speed	60 km/h
Comms Range	20 km
MTOW	5 kg
Payload Capacity	1 kg
Endurance	2 h
Recovery	parachute net or belly
Launch	hand launched

### PAYLOAD OPTIONS

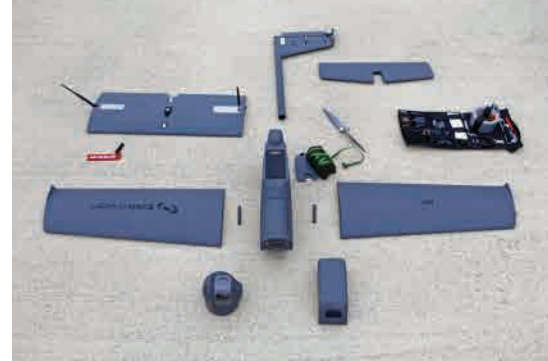

Multiple options for EO sensors, up to 4K definition

Multiple near-infrared to LWIR sensors

Laser illuminators

Communication relay systems

Biological and chemical analysers

Parts.

Assemble easily.

Launch.

Recover.
